GETTING INVOLVED: The senior horticulture class visited Mertoun Estate. All images: Selkirk High School

PUPILS at Selkirk High School have been advancing their learning across a variety of subjects throughout the last week.

Here is the latest update from the school.

Science

S1 scientists have been developing their skills using filtration apparatus, while pupils in S4 have been examining microbiology techniques.

Horticulture

The senior horticulture class visited Mertoun Estate gardens recently.

They chatted to the gardeners about routes into horticulture and gardening, options for careers and Lantra. Students had a walk, talk and taste session around the gardens.

Many thanks to Royal Highland Education Trust for organising.
